Profile

I am a novice programmer currently exploring the realms of software development, bringing a fresh perspective to coding and technology. With a strong background in graphic design, I have amassed over four years of professional experience as a freelance graphic designer, proficiently utilizing tools like Figma and Photoshop. My journey in graphic design has honed my skills in creating visually compelling and user-friendly designs. I have extensive experience in visual hierarchy, which allows me to bring clients' imaginations to visual experiences. Now, I seek to integrate my design expertise with my budding programming knowledge to develop aesthetically pleasing and functional digital solutions, aiming to create seamless and engaging user experiences.
